PRODUCT DATA SHEET

DAB-DP151MP • 701509

PRODUCT DETAILS

The DAB DP151MP pump is a rugged cast iron, twin impeller. self-priming, surface mounted jet pump. By using a seperately supplied injector kit the pump can achieve a suction capability of up to 27m

APPLICATIONS

- Situations where self priming operation is necessary
- Suppying water to domestic installations
- Ideal for use in small-scale agriculture or horticulture
- Pressure boosting, irrigation, wash down or other limited industrial services
- Designed for pumping from tanks, rivers and dams where air bubbles or small particles of sand are present
- Lateral Offset pumping

FEATURES

- Self priming centrifugal pump with excellent suction capability
- 240V single phase TEFC motor with in-built auto reset thermal overload to prevent pump from damage
- Pressure switch with adjustable differential
- Pressure gauge
- Drive pipe 1" G Suction pipe 1 1/4" G

To protect the pump from excessive cycling and to isolate from the effects of water hammer, adding a pressure tank to the system is highly recommneded

TECHNICAL DATA

RATED POWER (P2)	1.1kW (1.5hp)
MAX. FLOW [LPM]	58 LPM
MAX. HEAD [M]	60m
MAX. PRESSURE RATING	8 bar
FLUID TEMP RANGE	0 - 35 deg C
MAX. AMBIENT TEMP	40 deg C
PUMP BODY	GJL 200 Cast Iron
IMPELLER	Glass reinforced Noryl
JET, VENTURI, DIFFUSER	Glass reinforced Noryl
MECHANICAL SEAL	Carbon Ceramic Nitrile
O RINGS	Nitrile

RATED VOLTAGE (V)	1~ 220 - 240V 50 hz
RATED CURRENT (A)	7.0A
RATED SPEED (RPM)	2800 - 2 pole
IP RATING	I.P. 44
SUCTION CONNECTION	1 1/4" G (BSP)
DISCHARGE CONNECTION	1" G (BSP)
AUTOMATIC OPERATION	Yes via adjustable pressure switch
MOTOR PROTECTION	Auto re-setting thermal overload
CAPACITOR	31.5uF 450V =/- 5%
CARTON DIMENSIONS	427mm L x 248mm W x 307mm H
GROSS WEIGHT (KG)	28.5kg

Calculating offset application suction side friction losses:

In offset applications friction losses in pipework between the water source and the pump need to be added to the depth to water to provide an 'apparent depth to water' value.

Add 6% of the suction side distance to the depth of water value and use the combined value to select the correct injector As a general suggestion use 50mm suction and 40mm pressure 'drive' pipe sizes
