

PRODUCT PROFILE

PACKAGED PUMP STATION CONTROLLER ALARM

ZEN-ALARM DELUXE

12 Month Zenit Warranty - Parts & Labour

The alarm is designed to provide warning indication when a storage tank is either full or empty. The warning condition is determined by a float switch. Applications include effluent, grey water and rain water tanks.

The alarm is characterised by:

- IP55 plastic enclosure
85mm (h) x 55mm (d) x 125mm (w)
- 1.75 m power cable and three pin plug
- 10 m three wire float switch
- Power on LED
- Audible buzzer and visual flashing LED warning alarms
- The buzzer can be muted via the button. The flashing LED will continue to remain on until the alarm condition has been eradicated
- The audible buzzer will automatically silence after 8 minutes. The flashing LED will continue to remain on until the alarm condition has been eradicated
- Simple DIY installation

The alarm will be supplied pre wired for high level alarm applications.
