

Certified to  
NSF/ANSI 44

## PRODUCT DETAILS

The D1400 In-Out head is designed for up-flow pH neutralization applications providing maximum flow rates with minimal pressure drop.

Molded from a rugged thermoplastic resin, this 1" head has a standard 2-1/2" tank connection and. It features parallel inlet and outlet ports to easily adapt to standard plumbing connections or Clack's all-plastic, V3006 four-way bypass valve PN807500 .

The head features a 1/4" FPT air vent port which can be drilled out to accept an air relief valve.

Certified to  
NSF/ANSI 61 & 372

D1400 and V3006 combinations
