

# PRODUCT DATA SHEET

BIA-BPT-450 • 811179

## PRODUCT DETAILS

A pressure tank is engineered to optimize the performance of your pressure pumping system by storing a volume of pressurised water.

This increases the draw-down in the case of small water demand or leaks thus saving your pump from excessive starts and stops.

A pressure tank protects and extends the life of your pump and will reduce noise and needless power consumption.

## BRAND

**BIANCO  
PUMPZ**

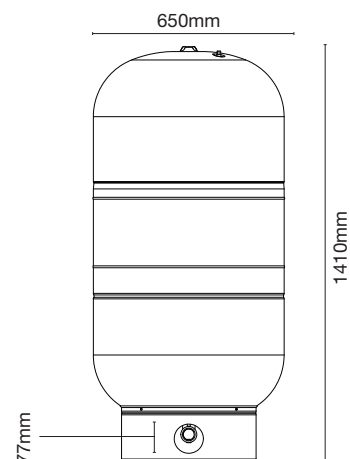

## FEATURES

- 4 bar nitrogen pre-charge
- Cold rolled carbon steel construction
- Butyl rubber diaphragm
- Food grade polypropylene liner
- 1 1/4" BSPF 304 grade SS inlet elbow

## TECHNICAL DATA

PRESSURE RATING	10 bar
MAXIMUM GAS PRESSURE	5.5 bar
MAXIMUM TEMPERATURE	90°C
TOTAL TANK VOLUME (L)	450
NETT ACCEPTANCE VOLUME (L)	149.9
NETT WEIGHT (KG)	56.9

## DIMENSIONS
