

PRODUCT DETAILS

The Welling & Crossley Parallel Cable is a passive parallel connection cable set that allows two identical W&C inverter generators, or two identical W&C portable power stations, to operate together in parallel and share the electrical load, providing a greater combined power output than a single unit.

FEATURES

The W&C Parallel Cable connects identical models ONLY — both products must be the same model. To parallel two different sized models, or an inverter generator with a portable power station, use the W&C Power+ Parallel Box (WC-PARALLELBOX • 813692) instead.

COMPATIBILITY

IDENTICAL PAIRS ONLY	
PORTABLE POWER STATIONS	2 × WC-BG2000, or 2 × WC-BG3600, or 2 × WC-BG5500
PETROL INVERTER GENERATORS	2 × WC-P3200SI, or 2 × WC-P6000SI, or 2 × WC-P9000SI, or 2 × WC-P11250I

TECHNICAL DATA

RATED VOLTAGE	240V AC
CABLE SPECIFICATION	Approx 2000mm total length. 10AWG wire (5.26 mm ²)
MAXIMUM COMBINED OUTPUT	Limited to approx. 90% of the combined RATED output of the connected products
